Our Plan

Our Plan is to revolutionize the crypto space with a Token that can be used to Bet on Sports and ESports through an online casino. We are hoping to create this online casino as soon as next year. When we do this it will almost be like a middleman trade where two people who are betting against each other give the casino(aka the middleman) their tokens and whoever wins the bet will get the money from the house(or middleman). When we make our casino it will either be through our website or through a dapp on the Binance Smart Chain(BSC Network).

Why We Chose The BSC Network

We chose the BSC Network because the fast block time and the cheap transaction cost are great for the users who will be using the coin. There will be no need to wait hours for your transaction or pay large amounts of your crypto just to send your tokens.
